

TEST PLAN DOCUMENT

1. Document Information

Project Name:

Module Name:

Version:

Prepared By:

Reviewed By:

Approved By:

Date:

2. Introduction

This Test Plan outlines the strategy, scope, objectives, resources, schedule, and deliverables for testing the application. It ensures the product meets business and technical requirements.

3. Objectives

- Validate application functionality against requirements
 - Identify defects and ensure timely resolution
 - Ensure system stability, performance, and security
 - Improve overall product quality
-

4. Scope

4.1 In Scope

- Functional Testing (UI & API)
- Integration Testing
- Regression Testing
- Smoke & Sanity Testing
- Database Validation

4.2 Out of Scope

- Third-party integrations not controlled by project
 - Performance testing (if not planned)
 - Security testing (if handled by separate team)
-

5. Test Strategy

5.1 Testing Levels

- Unit Testing (Developers)
- Integration Testing
- System Testing
- User Acceptance Testing (UAT)

5.2 Testing Types

- Functional Testing
- Regression Testing
- API Testing (Postman / RestAssured)
- Automation Testing (Selenium / Playwright)

5.3 Automation Strategy

- Framework: Hybrid (POM + Data Driven + BDD)
 - Tools: Selenium / Playwright
 - CI/CD: Jenkins / GitHub Actions
-

6. Test Environment

Environment	Details
OS	Windows / Linux
Browser	Chrome, Edge
Database	SQL Server / Oracle
Tools	Selenium, Postman, Jenkins
Build URL	(Add URL)

7. Entry Criteria

- Requirements finalized and approved
 - Test data available
 - Test environment ready
 - Build deployed successfully
-

8. Exit Criteria

- All test cases executed
 - Critical defects resolved
 - Test coverage achieved (e.g., 95%)
 - Test summary report completed
-

9. Test Deliverables

- Test Plan Document
 - Test Cases
 - Test Data
 - Defect Reports
 - Test Execution Report
 - Automation Scripts
 - Test Summary Report
-

10. Test Schedule

Phase	Start Date	End Date
Test Planning		
Test Design		
Test Execution		
Regression		

11. Roles and Responsibilities

Role	Responsibility
QA Lead	Test planning, review
QA Engineer	Test execution, defect logging
Developer	Bug fixing
BA	Requirement clarification

12. Defect Management Process

- Defects logged in JIRA
 - Severity levels: Critical, High, Medium, Low
 - Daily defect triage meetings
 - Status tracking until closure
-

13. Risks and Mitigation

Risk	Mitigation
Environment not ready	Coordinate with DevOps
Requirement changes	Frequent review meetings
Resource shortage	Prioritize critical tests

14. Tools

- Test Management: JIRA / Azure DevOps
 - Automation: Selenium / Playwright
 - API Testing: Postman / RestAssured
 - CI/CD: Jenkins
 - Version Control: GitHub
-

15. Approval

QA Lead:

Project Manager:

Client Approval:

16. Sign-Off

This document is approved and accepted for execution.
